Time It Vocab Review

No. of Players: alone, with a partner, or as a whole class

Materials: one set of vocabulary picture cards per person or for the whole class

Instructions:

- Give a student a stack of picture cards and place them in a pile face down.
- A person sets a timer to see how quickly the student can get through the cards and say each one correctly.

Variations:

- Set a timer for a specific amount of time and see if the player can get through the cards in that time.
- Or, do as a whole class together. Teacher holds up the cards as the students shout them out.
- Or, do as a whole class by having students stand in a circle or line and giving each person a card. Start the timer and go down the line or around the circle with each person saying their word.
- Or, as a whole class, have first person say their card, second person says first person's card plus their own, and it continues this way. If standing in a line, players will have to remember the cards. If in a circle they can look at the pictures.
